-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,7-12,16,25-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over John (6066163).

John is considered to render obvious all of the subject matter of the above claims. As taught in col. 3, lines 9-65, and col. 5, lines 5-15, the device of John can be implanted. It is considered to have been obvious and desirable to enclose all of the structure into one control module in order to provide for ease of implantation. Further, it is considered obvious to use a biocompatible surface for the module in order to not affect in a negative way the tissues of the patient. See col. 6, lines 8+, and col. 10, lines 20+ for a description of the methodology used in the invention, which is obvious over that set forth in applicant's claim 16. The subject matter of claims 7, 8 are considered to be intended use, and not a structural limitation. Claim 25,26 are considered to be obvious in light of the knowledge of the skilled artisan in the brain stimulation art. Re claim 30, see col. 5, line 30.

Since new art has been used, this office action is not made final.

Allowable Subject Matter

3. Claims 2-4, 17-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
